

Year 5 Homework, Summer Term 1, Week 1

Due in: Wednesday 22nd April 2026

1. Round 4432 to the nearest 100.
2. $544 + 322 =$
3. What is 4×4 ?
4. $782 - 221 =$
5. $7 \times 5 =$
6. What is the value of the underlined digit? 3224

1. Round 2,221,989 to the nearest 10,000.
2. $1124 + 4432 =$
3. What is 8 squared plus 7 squared?
4. $77822 - 21122 =$
5. 772×69
6. What is the value of the underlined digit? 332, 221

1. Round 2,221,989 to the nearest 10,000 and 100,000.
2. What is 6% of 180?
3. What is 8 squared plus 9 squared?
4. What is MMXXII?
5. 18772×69
6. What is 20% as a decimal and a fraction?

Reading Comprehension

Please complete the reading comprehension

Spellings

Can you use some of the spelling strategies that we use at school to practice these spellings?

answer

eight

learn

purpose

appear

enough

Optional Challenge

Can you have a go at this maths

challenge for an extra merit point?

12. Complete the table below by adding a **suffix** to each noun to make an **adjective**.

Noun	Adjective
pain	
star	
wind	
power	
danger	

Planet Earth

We all live on Earth...why? Well, Earth is the only planet in our solar system that has all the things we need to survive: 21% oxygen in the air to breathe, water to drink and all at just the right temperature warmed by the Sun. Its name comes from the Old English word 'ertha' and the Anglo-Saxon word 'erda' which means ground or soil.

The Blue Planet

Earth, the third planet from the Sun after Mercury and Venus, is referred to as 'The Blue Planet' because of how it looks from space. This is due to the fact that over $\frac{2}{3}$ of the Earth's surface is covered in water.

Did you know?

- Age: approximately 4.54 billion years
- Diameter: 13,000 km
- Distance to Sun: 150,000,000 km
- Surface Temperature: 15°C
- Highest point: Mount Everest 8.8 km
- Lowest point: Challenger Deep 10.9 km below sea level

I'm Spinning Around

The Earth spins on its axis once every 24 hours – that's what gives us day and night as we spin to face the Sun and then away from it again. You wouldn't notice but the Earth's spin is actually slowing down by 17 milliseconds per hundred years. Eventually this will lengthen our days but it will take around 140 million years before our day will have increased from 24 to 25 hours. I wonder if children 140 million years from now will have an extra hour at school.

Whilst it is spinning, the Earth is also orbiting The Sun, which takes $365 \frac{1}{4}$ days to do one full circuit. This gives us the length of our years. Our seasons are also dependent on the orbit of the Earth as our planet is tilted at an angle. This means that around one side of the Sun we are tilted towards it – giving us warmer temperatures and longer days...our summer. However, around the other side of the Sun we are tilted away from it giving us less light and cooler temperatures – this is our winter. All in all, it's a pretty amazing planet and I, for one, am glad to call it home.

Questions

1. What percentage of Oxygen is in the air we breathe?

2. What is the highest thing on Earth?

3. How long does it take the Earth to spin once on its axis?

4. Will the Earth always spin at this speed? If not, how will it change?

5. How many planets are between us and the Sun and can you name them?

6. Why do we experience summer around one side of the Sun?

7. Why is Earth also called 'The Blue Planet'?

8. What 3 things make it possible for us to survive on Earth?
